

## "ROTS AND SPOTS" LOVELY IN CAKES, DEALERS INSIST

Samples Are Proudly Shown in Court, but No One Will Eat Them.

TRENTON, N. J., March 21.—The dealers in "rots and spots" eggs made another strenuous endeavor yesterday to prove that even if they did use rotten eggs that was no concern of the public and that anyway cakes made out of rotten eggs were just as good as cakes made out of good eggs. They did not draw attention to the incidental saving on the use of rotten eggs instead of good ones. The occasion was the resumption of the trial of the Government's suit to condemn some ten tons of "egg mixture" seized in Jersey City.

The Lederle Laboratories, which Ernest Lederle, New York City's Health Commissioner, founded, were drawn into the affair and affirm that rotten eggs, even though in an advanced stage of decomposition, are not injurious to health when baked into the delicate confections known as pound, sponge and egg cake, or into macaroons or ladyfingers.

Employees of the Lederle Laboratories, one of them a physician, testified that the spot egg mixture was all right in cake manufacture and produced in a safe specimen of cake which it was admitted had been manufactured out of the rotten mixture. There was neither smell nor taste from that manufactured from really good eggs. But few of those in the courtroom evinced a desire to indulge their appetites with such cake.

The trial will continue to-day.

### FIND LOST HEIR IN FLAT.

Detectives yesterday found twenty-three-year-old Henry Dubois, heir to a \$1,000,000 estate in Santo Domingo, who disappeared from his aunt's home in the Hotel Baldwin, Manhattan, last Friday.

Mr. Dubois, his aunt, was taking him back home, after having slighting his studies in the New York College of Dentistry, she heard. He was located yesterday in a flat at No. 31 Bergen street, Brooklyn, and he admitted he had become infatuated with a woman there.

His aunt takes the young man to Santo Domingo to-day. She says there are too many temptations for him here.

**Biggest Twine Order in World.**

The Post-Office Department wants to buy 1,900,000 yards of jute twine and 1,500,000 paper fishing lines, to be used in marking packages of letters.

They are the biggest single orders in their respective classes in the world. The twine is used in every post-office in the country.

**Choir Robed in Harem Skirts.**

It is reported that when Volva begins a series of meetings in the Coliseum, Chicago, May 11, the young members of his choir will wear harem and the older members harem skirts.

Zion holds the harem should be called "Elijah the Second skirt" because the late Dowine set the pace by wearing one.

**Horse Pursues and Kills Dog.**

"Midnight," a horse used by Sergeant Edward J. Hughes, was bitten by a vicious bulldog at Broadway and Two Hundred and Forty-second street.

The horse was so mad he forgot all about his rider and ran straight for the dog, the policeman jumping off. The dog was pursued three blocks before the horse overtook it and stamped its life out.

**Ends Naps in 2 States at Once.**

Because of a new survey, no longer can persons sleep with their heads in State of Maine insects and their feet in Connecticut in some of the old landmarks.

The Parks House at Canaan is now wholly in Massachusetts, as is the old tavern at Clayton, Mass., where the proprietor used to roll a barrel of whiskey from one State into the other when bussed by officials.

**Boys of 45 Protest.**

To bring the cause of the man under forty and prove that he is only fairly mature at that age, the Anti-Forty-five Year Ago Legion League has been chartered in Illinois.

The orators in Chicago say that men hope to help in the end the idea that men are handicapped at forty-five or fifty.

**Permit for Her Harem Skirt.**

Regarding discussion as to better part of value, Miss Marie Schmidts went to the Chief of Police and got a written permit before she appeared on the streets of Traverse City, Mich., in her new harem skirt.

Police protection was assured her and she was not molested when she gave the natives their first view of the new garment.

## NO MORE PADDING FOR THE MEN, IS TAILORS' EDICT

No more padding, gentlemen. This is the watchword of the tailors who make the styles.

The "well dressed" man will be just what he is, nothing more, this spring. There will be no more "athletic shoul-

ders" for the girls to go into raptures over—or on—if the cutters have anything to do with it.

The new coat will be as much wider than the shoulders as twice the thickness of the cloth, say members of the New York Custom Cutters' Club, which has an exhibition at the Merchant Tailors' Association, No. 24 Fifth avenue, that puts the ribbons on the hypertension coat that contains, rather than conceals the masculine beauty of so many male bodies.

He is not allowed to deceive the public with a pad.

The cutters are going to put a new one over this spring—the "aviation coat." It is not necessary to own an airplane to wear one. It is a regenerated form of the Norfolk jacket. The latter is coming back, too.

The trousers that go with this aviation coat fit close to the leg below the knee and run so far down into the shoe they might as well have feet in them.

For ordinary wear, trousers will be "skimpy." They will be so limited in their capacity it will be necessary to remove the shoes to get them off. The "pegotop" is on the toecap.

If a man has less shoulder on one side than the other, he must be honest and announce the fact through his coat.

Wadefoots will be high without col-

lars and cut to show as little linen as possible. This will be bad news to the laundryman.

As to color, a red brown will be the favorite. But there also will be soft grays and blues. The new styles will hit the padded shoulderered, pegtopped college boy hardest.

Carpenter Hurt in Opera-House.

While moving scenery in the Metropolitan Opera-House at 3 o'clock this morning, Harry Angelborg, twenty-seven, of No. 290 St. John's avenue, the Bronx, a stage carpenter, was struck by a toppling setting and had his leg broken. He was taken to Bellevue Hospital.
